

Amendments To The Specification

Please replace the paragraph [0033] with the following amended paragraph:

[0033] FIG. 3 explains the sectional view along line B-B in FIG. 1. Herein, the reinforcing pipe 11 made of metal, preferably steel such as stainless steel, is shown, said reinforcing pipe being surrounded by the plastics pipe 12 for limiting the lumen 9 in this region.

Please replace the paragraph [0036] with the following amended paragraph:

[0036] As an alternative to the embodiments of FIGS. 1 to 4, it is conceivable that the portion 10 as a whole is formed as a metal pipe, i.e. not consisting of two concentric pipes, as shown in FIGS. 3 and 4. In this case, the metal pipe 11 has a massive cross section in which a longitudinal borehole is made for forming the lumen 8 and an adjacent borehole is made for forming the lumen 9. In another embodiment which is basically conceivable, the ~~plasties~~ plastic pipe (which would correspond to the portion 17 being designated with a dotted arrow in FIG. 1) ensuing the metal pipe is also formed as a pipe with a massive cross section, in which corresponding boreholes are provided for the continuation of lumen 8 or 9.
